

SPONSORSHIP PROSPECTUS

Sponsor the room where Mumbai's elite mobile architects are forged.

A 5-part, production-grade engineering lab. 80–120 senior engineers per session.
An outcome cohort of 15–20 certified Mobile Architects who build a real product
with your tools — across 5 labs and in their own codebases.

• WHY THIS, WHY NOW

Mumbai is full of meetups. None of them build architects.

Beginner saturation

The ecosystem is flooded with intro talks and slide decks. Senior engineers have nowhere to go deep on real production systems.

No path to T-shaped

The market rewards engineers who are *deep* in one stack, *fluent* across the rest, and grounded in fundamentals — observability, principles, trade-offs. Nowhere teaches all three together.

Tools picked in the dark

Tech leads choose SDKs, CI, analytics & AI tooling for entire orgs — but rarely get to *use* them under real production pressure first.

MAL closes all three gaps at once — and puts your product at the centre of the moment a senior engineer decides what to adopt.

• NOT A SERIES. A LAB.

An applied engineering funnel — built live.

Speakers teach the *decision*, not the feature. Across 5 Saturdays each architect builds **their own product** — a hyperlocal marketplace with offline-first AI — levelling it up every session across five dimensions:

- **Architecture & Platform Mastery** — real systems, real trade-offs
- **On-device & Hybrid AI** — offline-first inference, MCP agents, codegen
- **Production DevOps** — CI/CD, OTA, observability
- **Design & Growth** — UX, telemetry, deep links, attribution
- **Security** — pinning, RASP, VAPT on a real build

• THE OUTCOME FUNNEL

80–120

engineers in the room, **every session**

15–20

graduate as **Certified Mobile Architects** via take-home "Architect Proof" challenges

3 months

sustained engagement — not a one-night impression

WHO'S IN THE ROOM

High-intent, high-seniority, decision-making developers.

Mid-Sr

Engineers, tech leads & staff-level mobile devs

Founders

Startup CTOs & technical founders choosing their stack

Gated

Application-reviewed entry — serious builders only

400+

Cumulative senior-dev touchpoints across 5 sessions

What they control

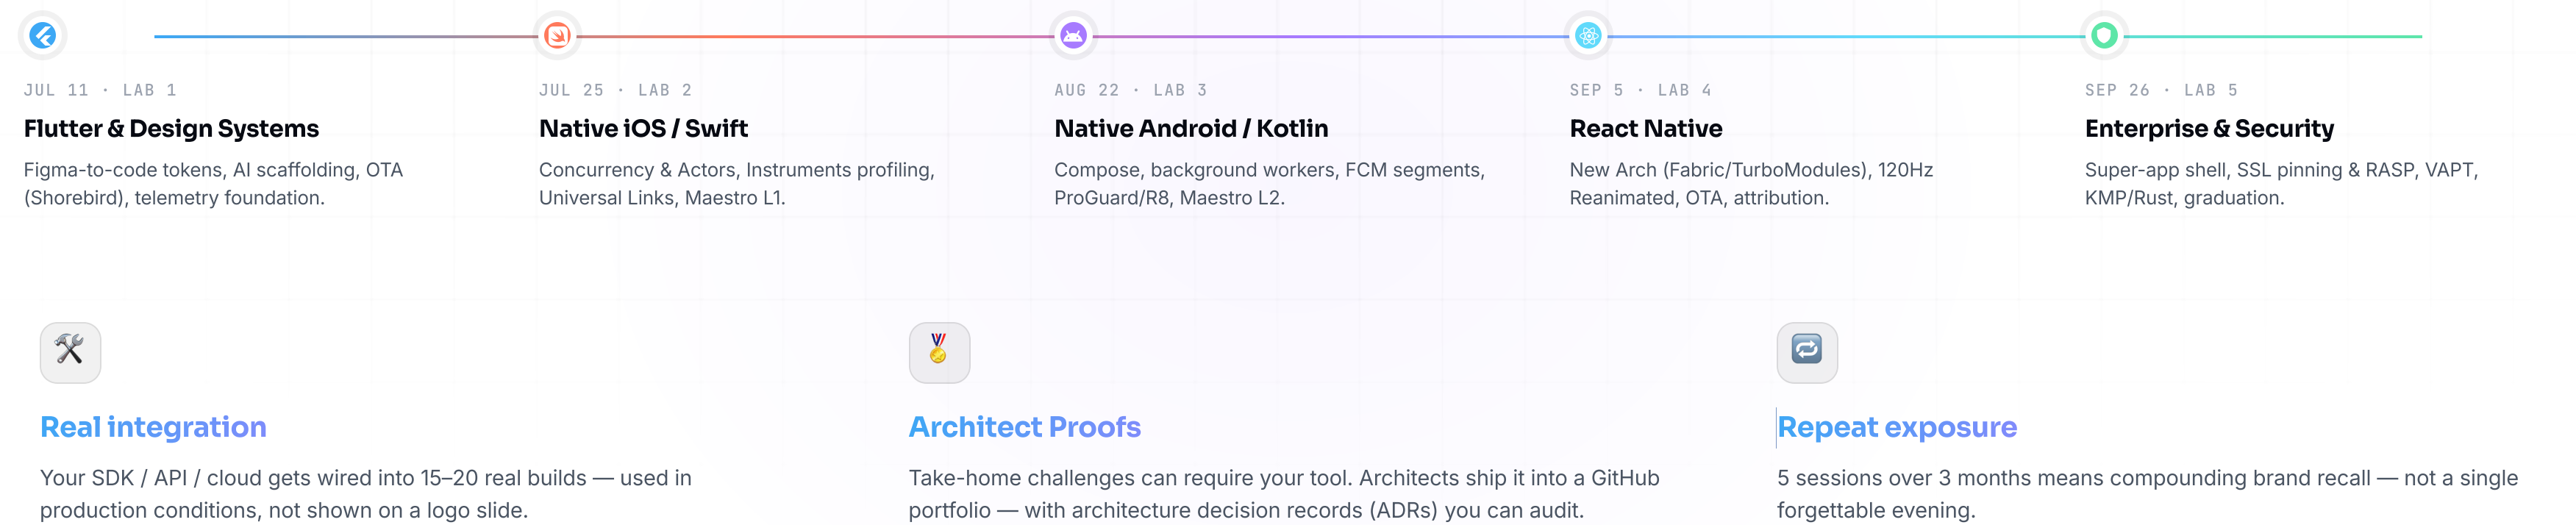

SDK adoption, CI/CD platform, crash & APM tooling, analytics & attribution vendors, AI dev tools, cloud & BaaS — for their companies, not just themselves.

Why they show up

To go from "coder" to "architect." They're motivated, they execute the challenges, and they remember exactly which tools made the live build work.

5 LABS · 3 MONTHS · ONE PRODUCT, BUILT BY EVERY ARCHITECT

Where your tech gets used.

• THE PITCH IN ONE LINE

Standard sponsorships buy a logo people ignore. MAL embeds your product into **the build** — and into the codebases of the engineers who pick tools for their teams.

- **Broad reach + deep adoption.** 80–120 in the room *and* 15–20 architects building with you.
- **Real product feedback** from senior engineers using your platform under pressure.
- **Targeted recruiting.** Direct access to a pre-vetted pool of elite mobile talent.
- **Category ownership** as the tool associated with Mumbai's most serious mobile program.
- **Content afterlife.** Your tech features in session recordings, repos & social clips.

SPONSORSHIP PACKAGES

Five ways to partner.

TITLE

₹50,000

1 slot · exclusive

✓ Series naming & "Powered by"

✓ Live integration · all 5 labs

✓ Architect Proof inclusion

✓ 10-min keynote ×5

✓ Lead logo + finale jury seat

✓ Premium booth + hiring + socials

PLATINUM

₹30,000

2 slots

– Series naming

✓ Live integration · all 5 labs

✓ Architect Proof inclusion

✓ 5-min keynote ×2

✓ Logo on all assets

✓ Booth + hiring access

HIRING

₹20,000

4 slots · recruiting

✓ Full cohort résumé book

✓ Intros to 15–20 architects

✓ On-site interview corner

✓ "We're hiring" lightning slot

✓ Logo on all assets

– Live integration

ACADEMIC

₹2,000

colleges · labs · student bodies

✓ 5 reserved student seats / lab

✓ 1 sponsored Architect Proof seat

✓ Faculty observer passes

✓ Academic-partner logo wall

✓ Campus talent pipeline + CVs

– Live integration

COMMUNITY

In-kind

credits · devices · swag · food

– Series naming

– Live integration

– Architect Proof

– Keynote

✓ Community-wall logo

✓ Group social mention

Pricing kept intentionally accessible for the Mumbai market – adjustable per cash vs. in-kind value. Title slot is exclusive.

Your category, across every lab.

No single-session slotting. Your product is woven through all 5 labs — wherever it fits the live build, it shows up, session after session.

Cloud & BaaS

Backend, auth, storage & realtime the product runs on — in every lab.

AI Dev Tools

Coding assistants, MCP agents & codegen used live throughout the build.

On-device & Hybrid AI

On-device inference runtimes & small models — Gemini Nano, Core ML, ONNX, MediaPipe — powering the offline-first AI in every build.

CI/CD & Delivery

Pipelines, build infra & OTA shipping wired in across all 5 sessions.

Monitoring & APM

Crash, performance & observability watching the app as it grows.

Security & AppSec

RASP, SSL pinning, secrets & VAPT hardening the production build.

Analytics & Growth

Telemetry, funnels, attribution & deep-link tooling from lab one onward.

HOSTS & ORGANIZERS

Built by practitioners, for practitioners.

Vivek Yadav

Lead organizer · curriculum & tech ops

Yogesh Singh

Co-host · community & cohort experience

VENUE PARTNER

Paytm

Mumbai venue partner for MAL Lab 1.

RESERVE YOUR TIER

Title & Platinum slots are limited and allocated first-come. We'll tailor the integration to your product in a 20-minute call.
